

# Recirculation kit

## RCD-XHF

No more waiting for hot water. Rinnai can provide you with faster hot water wherever you need it. It does this by recirculating the water through any plumbing system, so it's always available in whatever part of the house you may need it.

Thanks to the frontal thermostat is possible to set operating hours, based on user's habits.

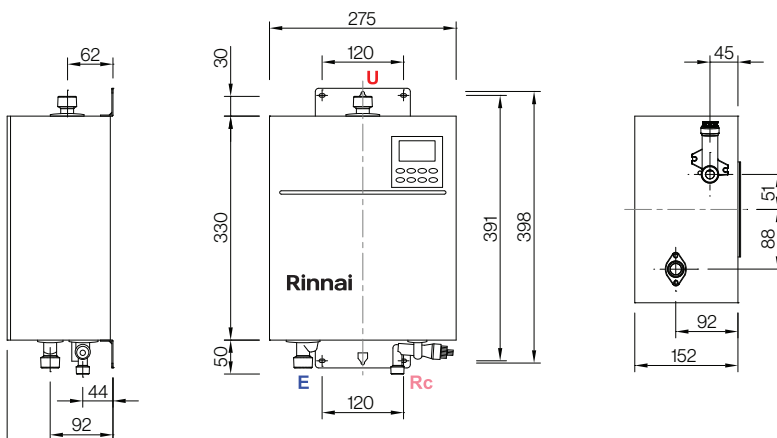

Antifrost protection system up to -15°C

Sustainable
