

Modus Infinity

Regular

Free standing design solution

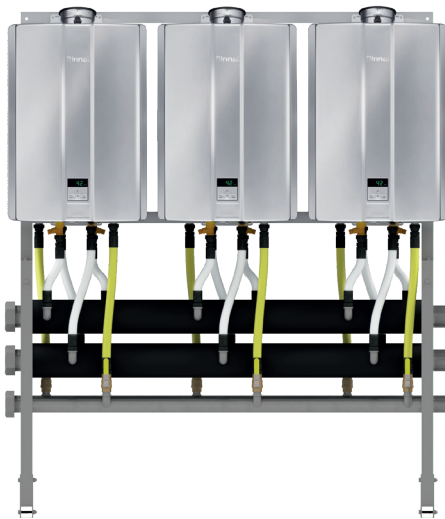

Image by way of example

It is designed to supply a packaged water heating solution as a fully assembled system. It's includes preassembled water and gas connections and manifolds under the tankless water heaters that are properly sized to maintain optimum performance.

Modular structure available corner-hanging and free-standing configurations, up to 10 WH each, for indoor and outdoor installations

- Easy to install**
- Space saving**
- Great operational safety**
- Great redundancy**
- A trained and qualified professional must install the Modus Infinity.**

	Coupled with tank	 MODUS	 Condensing
	Coupled with recirculation of DHW	 High efficiency	 Sustainable
	Coupled with solar panels

Water trunk connection type (R)	2" 1/2 - M					

Preassembled gas and water manifolds are properly sized to maintain optimum performance. Racks are constructed of powder-coated aluminum, powder-coated steel, and stainless steel to stand up to the most demanding commercial environments while minimizing weight.
